

## RIEGL "V"-LINE OF LASER SCANNERS

RIEGL VZ-400: LIGHTWEIGHT, HIGH RESOLUTION, HIGH SPEED

**RIEGL Laser Measurement Systems** launched its new **"V"-line Laser Scanners** with significantly improved performance data, with the highest ranging accuracy and reliability based upon echo digitization and online full-waveform analysis and excellent multiple target capability with an unlimited number of targets. The "V"-line scanners use the latest state-of-the-art laser technology (invisible laser beam, time-of-flight principle,

Laser Class 1), have very high pulse repetition rates up to 200 kHz and very high scanning rates up to 100 scans/sec. They offer the latest GPS, LAN, WLAN, USB, etc. interfaces, plus interfaces for high precision time stamping and mechanical interface for direct IMU mounting. "V"-line scanners are compact, rugged and lightweight design, weighing less than 10 kg.
