

Scanner Mount for Manual Tilt

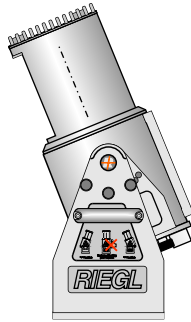

The *RIEGL* Scanner Mount for Manual Tilt serves to setup the scanner to a determined tilted position for comfortable covering the desired field of view.

Tilting range:

± 90° adjustable in steps of 5° and 10°

“+” Position

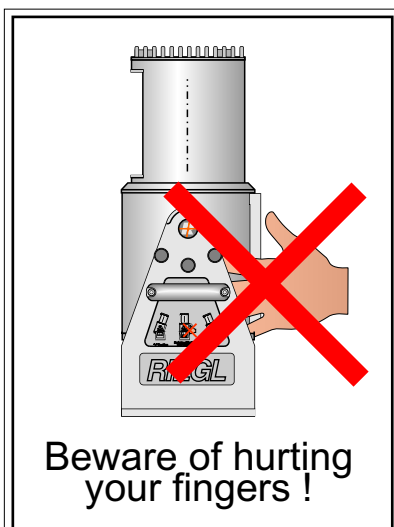

“-” Position

Tilted positions of the mounted scanner can be calibrated for straight forward registration of the scanner position.

NOTE:

In case the scanner is taken off from the tilt mount, the calibration is lost.

Part-No. 01RA09-00-002-01

SAFETY WARNING:

The damped tilting mechanism can reduce the risk of an undesired tilt motion of the scanner and, consequently, of a personal injury within limits only.

In any case the manual tilt mount has to be operated with the utmost caution!

The warning sign, affixed on both sides of the tilt mount, is indicating the risk of hurting your fingers.

Information contained herein is believed to be accurate and reliable. However, no responsibility is assumed by *RIEGL* for its use. Technical data are subject to change without notice. Data sheet, Manual Tilt, 07/07/05
