

RIEGL Laser Measurement Systems GmbH has been active in the field of LiDAR measurement technology for more than 40 years and is one of the world's leading companies in this area.

Starting in September 2026, RIEGL is offering an

Apprenticeship in Mechatronics – Production Technology (m/f)

This apprenticeship training focuses on the integration and commissioning of mechanical, electronic, and information technology components and assemblies.

Apprentices in the field of mechatronics work with electronic, electro-optical, and mechatronic parts, components, and systems for machine, plant, and equipment manufacturing. Their tasks also include maintenance and service work on electronic and information technology components.

Techniques such as soldering, crimping, pressing mechanical parts, wiring, assembly work, and bonding are used. Various mechatronic systems are put into operation, functions are configured, and parameters are set.

Duration of the Apprenticeship

total duration 3.5 years – divided as follows:

- Basic module mechatronics: 2 years
- Main module production engineering: 1.5 years

Qualifications

- Completion of nine years of compulsory schooling
- Interest in working with machines and tools
- Manual dexterity
- Technical understanding
- Careful working style
- Good basic knowledge of mathematics
- Logical and analytical thinking skills

The place of employment for the advertised position is one of our company sites in 3580 Horn.

Interested?

Then we look forward to receiving your application documents (motivation letter, CV, school report, etc.). If you submit your application digitally, please send it exclusively in .pdf format to bewerbung@riegl.com.

We offer all interested candidates the opportunity - by prior arrangement - to spend a trial day at our company to order to gain an insight into the apprenticeship we offer.

Our company is subject to the collective agreement for employees in the iron and metal processing industry. The gross monthly remuneration for apprentices in their first year amounts to € 1.000,-- for a standard 38.5-hour week.
