RIEGL VZ-i Backpack Mount

RIEGL VZ-600i / VZ-1200i terrestrial laser scanners can be used as a single-person portable kinematic laser scanning system by means of this backpack mount.

The scanner system can be attached and de-tached, picked up, and set down again by a single operator. The scanner is operated via Wi-Fi using the VZ-i Series app – no need for further system components.

This kinematic scanning system is ideal for use in rough terrain or pedestrian zones.

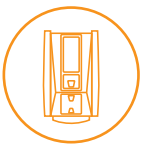

RIEGL VZ-600i kinematic data acquisition using a RIEGL VZ-i Backpack Mount

quick-release scanner mount

tripod adapter for easy pick-up and set-down
